Scott,

We have confirmed the inventory of results was lacking in the R2 EDD deliverables. We do have those missing ones, except that there were 4 samples that did not get one of their expected tests:

- PAH (ID-0016) for N02-CE03-TNBN-AS
- SVOC (SW8270LL) for N02-CE04-TNNE-AS
- Pesticides (E1699M) for N02-CE01-THKN-AS and N02-CE03-THKN-AS

We can prepare a new, comprehensive set of EDDs. Would it be OK for us to replace the multiple R2 EDDs with one each for LPR and Newark Bay? We had been splitting up to keep them no more than about 20,000 records, as that seems to be about where regular EDP slows quite a bit. But, it did make it harder for us to manage the inventory, and we did have completeness issues with CWCM survey #1. We could also use an Access (ACCDB) file instead of Excel. Please let me know your preference.

Thanks,

Jim Herberich

Hi Rob,

Please see the attached document and let me know if you have any questions. You can copy Scott and Sharon on the response.

Thanks,  
Stephanie

Stephanie and Elizabeth

Attached is a summary of the 1st Small Volume Chemical Water Column Monitoring data completeness. Please let me know if you have any questions.

Please note that item 4d has a fraction as the number of results. This is due to the fact that one of the samples has results for vanadium and barium where the others do not.

Regards
